

WILLIAM YEOWARD

CONCEPT FURNITURE IN PURE, PLAIN LINENS

Please order any of our Concept Furniture in our new range of stocked linens. We have sourced three beautiful pure 100% linen qualities in a total of 14 sophisticated shades from whites, naturals and greys to true William Yeoward blues. Of course you can also choose to upholster any of our pieces in a material of your own choice should you prefer (COM). Our new linens are all held in stock and have been FR treated to meet with current legislation.

SEAT CUSHION FILL OPTIONS

Feather Foam Wrap – semi-firm with a soft surround. More regular plumping required.

Quallofil Fibre – a firmer option with a bouncier feel. Less regular plumping needed.

Doamed Foam Fibre Wrap – our firmest option. Almost no maintenance required.

100% Duck Feather (surcharge) – our softest option. Very regular plumping required.

WILLIAM YEOWARD

CONCEPT FURNITURE - TECHNICAL INFORMATION

WOOD MACHINING

All the parts are hand made by machine set up by the operator and the material then cut to lengths, angles etc by the action of the operator. Shaped parts are drawn onto the timber by way of a pattern template and then hand cut on the Band Saws. All timber are planed on a machine which again is set up by the operator and put through by hand.

All of the wooden frames are assembled by hand by experienced craftsmen.

All frames / parts are constructed using a traditional glue, screwed and doweled method.

All frames are constructed using Hardwood materials mainly Beech, Birch and Oak. All of the timber used is FSC certified from sustainable sources.

The glue is a water based adhesive but not totally toxic free as this does not exist commercially yet.

UPHOLSTERY

Hessian is biodegradable, foam & feathers recyclable.

The nails / screws / staples / springs are all made of steel and recyclable

All packaging ie cardboard and polythene is 100% recyclable.

The frame is 99% sustainable / recyclable. The upholstery 60% is recyclable.

The final product based on the combined above information creates an approximately 75/ 80% recyclable/ sustainable product being a high percentage in the marketplace.
