

BACKGAMMON SET - INLAID GRID WOOD ILLUSION

£495.00

Description

This beautifully presented marquetry backgammon set will make the perfect gift.

The Grid Wood veneer has been created by the Swedish design studio Front. Grid is a veneer based on an ancient pattern that creates the illusion of a grid structure. Four different toned woods are joined together as a block, then thin layers of veneer are planed off to create the veneer. The result catches the light and gives a sense of depth to the flat surface. Front's design objects often communicate a story to the observer about the design process, about the material it is made of or about conventions within the design field. Front's work is represented at MoMA, Victoria & Albert Museum and Centre Pompidou.
