

SMALL ACRYLIC PENGUIN 60CM

£85.00

Description

Take a trip to Lapland this Christmas with this wonderfully charming LED penguin. At 60cm tall this little chap will look marvelous next to your Christmas tree or fireplace, greeting guests by the front door or adding a little touch of magic and sparkle to your garden. Emitting a traditional icy white colour, the 80cm Penguin Figure is crafted from a robust wireframe which allows him to stand strong throughout the winter months, whilst providing an artistically designed body around which the 80 mains powered LED lights are wrapped. With an ample 10m cable length, you have all the freedom you need to plug in to your nearest mains socket, without straining or having hazardous taut wires. Once set up, the handy Easytimer™ function will allow these beautiful lights to illuminate for 8 hours at the same time every day, whilst an innovative memory function will recall the time at which you want your lights to switch on - even after turning off at the mains socket! Highly economical, the energy-saving LEDs from NOMA are the go to choice for a one-of-a-kind spectacle, whilst respecting the environment for a planet-conscious Christmas.
