

## WOOD VENEERS & FINISHES

### Description

#### Wood Veneers

We have hand selected 16 wood veneer finishes and 4 engineered wood veneer finishes for you to curate your very own look. Engineered veneers are sliced from rapidly growing and softer renewable tree species. The slices are later dyed, dried, and glued together into blocks of different shapes. These blocks are then sliced and glued again according to the desired engineered veneer texture and pattern.

#### Metallic Vinyls

As an alternative to our wood and engineered wood veneers please select from our range of 11 metallic vinyls for your base option. These metallic vinyls use no chemicals in application and provide the sleek appearance of metal.

#### Price Tiers

All our finishes have been split into 4 pricing tiers. Please see where each finish sits below:

Tier 1	Tier 2	Tier 3	Tier 4
Ash Veneers	Engineered Veneers	Burr Poplar	Burr Walnut
Tulipwood Veneers			Metallic Vinyl
Bamboo Veneers			

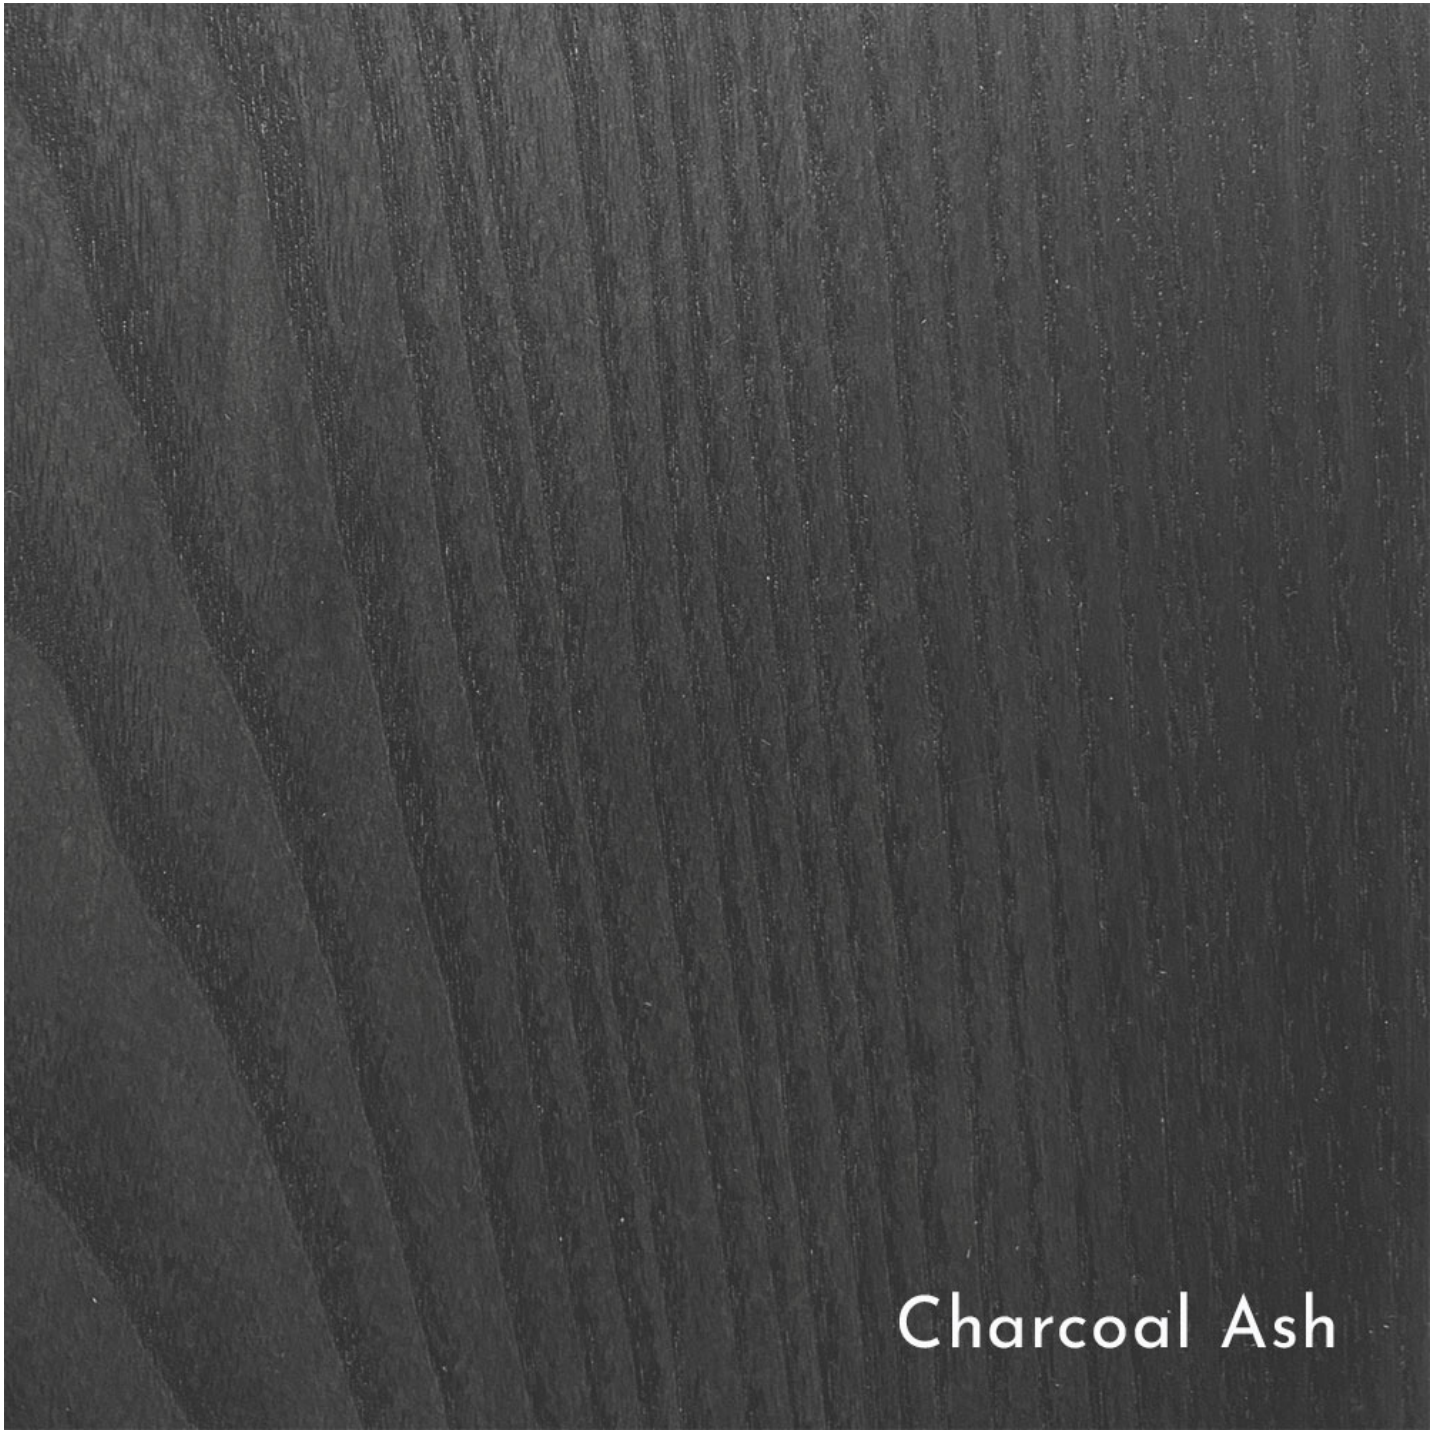

For more information on our Veneers and Finishes, please download our tear sheet below. For more information or if you wish to order a sample please contact us direct on [enquiries@williamyeoward.com](mailto:enquiries@williamyeoward.com) or call us on +44 (0) 20 7349 7828.
