

CHERINGTON BOOKCASE

Description

A glamorous painted bookcase made for William Yeoward's country drawing room. A staple of the Yeoward furniture line for more than 20 years much used altered and changed the Cherington still commands respect wherever it appears. The elegant hand turned urns and the delicate proportion of the glazing bars only go to make sure that the design savvy never pass it by. Produced also in oak this piece can be slicked up and flipped up by removing the urns and handles to showcase a simpler style. Use it opposite a large bed and mirror the doors to house AV equipment. As with all William Yeoward bespoke furniture the Cherington Bookcase can be crafted in a variety of timbers from oak and chestnut through to mahogany and walnut but almost best of all painted, choose from our 3 shades of off-white or select your own colour to suit your interior.
